

GET A GRIP ON YOUR ASSETS

Misco AMS, powered by Parago is a powerful PC Discovery and Software Asset Management (SAM) system that also enables schools to manage all inventory in one complete solution.

Developed in conjunction with schools and authorities across the UK, Misco AMS powered by Parago, has become the best selling asset management system in the education sector. That's because it addresses both the needs of all users within the school and its budget. The solution is used by Primary schools with 100 assets to Academies with 5,000 assets.

Misco AMS enables the creation of accurate procurement plans and budget forecasts that optimise future funding. Schools can clearly see what assets they have and what gaps exist.

Why is Misco AMS the answer?

- Misco AMS eliminates timely audits that are associated with PCs, software and general inventory as well as giving you immediate access to 'up to date' comprehensive data.
- Misco AMS saves schools money and enables you to create accurate procurement plans and budget forecasts that optimise future funding
- Misco AMS is developed in conjunction with schools and authorities across the UK and ensures compliance to e-safety, FMSiS, ICT Mark, CfP, Home Access, BSF, as well as software licensing laws.

Key advantages of Misco AMS

- Designed and developed specifically for education
